

GLOBAL LINK CAFFOLDING

Enviromental Policy

Enviromental Policy Statement

Global Link Scaffolding attaches great importance to protecting the enviroment and will continue working towards introducing procedures and the use of materials to help minimize any pottential adverse effect caused on the enviroment caused by carrying out of our and our clients day to day operations.

Global Link Scaffolding will therefore:

- Comply with all applicable enviromental legislation and codes of practice
- Take positive action to minimize waste and encourage recycling for the company and its clients.
- Maintain management controls and procedures to implement enviromental objectives.
- Work with clients and suppliers to encourage the sourcing of material from sustainable resources.
- Improve efficiancy in the use of fuel, water and raw materials.
- Raise company and clients awareness of the commitment to maximize enviromental performance.
- Review the company enviromental policy annually to take account of legislative and organizational changes.
- Creation of and effective organization is dependent upon the commitment and involvement of all employees.

This statement is endorsed by the companys directors, who take responsibility for its execution and for the implementation of this policy.
